Topic

The presentation "Bicycle route concept Rheine" is about bike-friendly measures and bicycle paths in Rheine.

First, the percentage of bicycle traffic in Rheine is portrayed, then the bike paths in Rheine be divided into two categories.

The first category are the everyday bike paths which lead to the office, the school or to the supermarket. They run mostly on the side of roads.

The second category is the leisure time bike paths, which are used for bicycling tours. They usually run in nature.

For both categories it is explained in how far they are already existing and what is done to expand them.

In addition the bike station, the hire bikes and the charging stations for electric bikes are described.

The presentation ends with a look ahead into the future.
